Art Unit: 1761

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 2, 4, 6, 9 and 10 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Moreau et al for reasons of record.

Applicant urges that Moreau does not teach an edible gel capsule. This has been considered but is not persuasive since the claims call for an organo gel, which applicant defines as a "liquid fatty component and a mixture of sterols" at page 1.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 6 and 9-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jandacek (1413102) in view of Moreau for reasons of record.

Art Unit: 1761

Applicant argues that one would not select Moreau to produce an organogel. This is disagreed with. Given the disclosure to Jandacek, one would certainly have the known oil that has hydrocholesterolemic properties at their disposal.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jandacek in view of Moreau as applied to claims 1-4, 6 and 9-13 above, and further in view of Lansbergen or Sassen for reasons of record.

No specific arguments have been addressed herein and the rejection is maintained.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
